PREFACE.

THE fifth edition of THE JEWELERS' WEEKLY COMPLETE DIRECTORY is a new book, not a revision of former issues. The compilation is the result of extended and most careful work in every detail, and while in a book of such magnitude as the Directory, absolute accuracy throughout is impossible, the publishers are convinced that it is by far the best list of the kind ever offered the trade. The labor incident to the compilation of an entirely new list will explain and, it is hoped, excuse the unexpected delay in issuing the work. The publishers extend thanks to the many members of the trade who have assisted them, and express their appreciation of the courtesy of the publishers of the following copyrighted directories, by whose permission their publications have been utilized:

The Trow Business Directory of New York City, published by the Trow Directory, Printing and Bookbinding Co.; the Lakeside Business Directory of Chicago, published by the Chicago Directory Co.; the Philadelphia Business Directory and the Atlantic City Directory, published by Jas. SOME TRUTHS REGARDING THE AJAX WATCH INSULATOR.

The Ajax Watch Insulator is the best Insulator in the market, but unfortunately it is imitated. The fact, however, that it is counterfeited is sure evidence of its value. There are numerous imitations of the Ajax Watch Insulator, which agents and dealers have been persuaded to buy because they are represented to be just as good as our Ajax Insulator. They are not, however; but like every counterfeit they are lacking the wonderful qualities of the genuine.

Ask for the Ajax Watch Insulator and take no other.

Klein School of Optics,

No. 2 Rutland Street,

Boston, Mass.

The only Scientific Optical School in America in which all branches of optics are taught, from the fitting of spectacles to the grinding of the most complicated lenses. Three courses, each complete, and fitting the graduate to enter medical schools. Also a post graduate course for physicians and opticians.

The First Course includes Anatomy, Physiology, Chemistry, Algebra, Trigonometry, Physics, Latin (optional) and German (optional).

The Second Course includes an outline of Anatomy and Physiology of the Eye, practice with the Ophthalmoscope, Ophthalmometer Retinoscopy, Perimeter, Test Lenses, Prisms, Diseases of the Eye and Mydriatics. This course is practically a course for physicians and opticians who desire to perfect themselves in the Art of Optics. . . . . .

The Third Term is mechanical, and includes the fitting of frames to the face, the grinding of lenses, &c. This course is perfect by itself.

All three courses constitute the complete instruction in the school.

GOLD SHELL.

Gold Shell Rings

are superior to any in the market, and the name is derived from the test of quality to which they can be submitted.

Cut one of our Gold Shell Rings and submerge it in a diluted solution of 2-3 nitric acid and 1-3 water until the entire composition is dissolved and there will remain a perfect "Gold Shell."

It is a simple test, and if tried on our rings and compared with the so-called gold filled rings and low karat solid gold rings with which the market is flooded, the result will be a convincing proof that our goods are the best.

AUTOMATIC SOLDER CUTTER.

THIS illustration represents our Automatic Solder Cutter. Being provided with friction feed and rolls, the cuts may be regulated from 5-16 square to fine dust solder. The principal advantage of this Solder Cutter over others is that you do not have any troublesome cutters to change whenever you want to cut different size solder. Two simple adjustments are all that is required to change to any cut desired. Working automatically it needs no attention after once started, as long as there is stock to feed to the cutting plunger. Anyone capable of setting a plunger to a power press can set this machine.

We solicit your inspection of the same.
